PROFILE

Fourth-year Electrical and Electronics Engineering student at Manisa Celal Bayar University with a strong interest in projects.

Currently working as a Project Developer at the university's Project Coordination Application and Research Center, actively contributing to TEKNOFEST/TÜBİTAK-supported projects. Worked with MATLAB/Simulink, AutoCAD, Proteus, and SOLIDWORKS, with a focus on sustainable and efficient engineering solutions. Selected for the European Bank for Reconstruction and Development (EBRD) & Polat Enerji Capacity Building Program for the Energy Sector. Enriched my English proficiency (C2) with enhanced international communication skills gained through two consecutive summers of work experience in United States of America. I love to be in a teamwork. I also value continuous self-development, an active social life, and regular engagement in sports activities.

WORK EXPERIENCE

Ektam Makine SAN. TİC. A.Ş., ENGINEERING INTERNSHIP Electrical Automation Trainee	08/2026 – 09/2026 İZMİR, TÜRKİYE
CONSECO YATIRIM ENERJİ SAN. VE TİC. A.Ş., ENGINEERING INTERNSHIP Thoroughly analyzed modern energy projects and system installations during active fieldwork for a month.	07/2026 – 07/2026 İZMİR, TÜRKİYE
MANISA CELAL BAYAR UNIVERSITY PROJECT COORDINATION APPLICATION AND RESEARCH CENTER, PROJECT DEVELOPER After individually participating in the development of many projects and being in frequent contact with the university's project office, I started to join the office team as "project developer". I actively participate in multidisciplinary projects.	03/2025 – 06/2026 MANİSA, TÜRKİYE
SAMOSET RESORT, HIGH TIDE, TRADE WINDS ON THE BAY, SERVER/TOURISM Worked at three different establishments and worked more than 92 hours per week with being in the "Work and Travel" student exchange program for two summers (2024-2025).	06/2024 – 10/2025 MAINE, UNITED STATES OF AMERICA

EDUCATION

Electrical and Electronics Engineering, 4th-Year Student, Manisa Celal Bayar University	09/2022 – Present Manisa, Turkey
--	-------------------------------------

PROJECTS

Erasmus+ KA152 Youth Exchange Project, Project Developer Co-developed an Erasmus+ KA152 project in partnership with Italy, successfully securing a €39,200 grant as part of a 5-person core team. Actively shaped the project's conceptual framework—focusing on the innovative integration of Artificial Intelligence to enhance cross-cultural interaction—while contributing to the grant application, international networking, and activity scheduling.	05/2026 – Present
(COMPETITION FINALIST) MOBILE SATELLITE TERMINAL, TEKNOFEST - MOBILE SATELLITE TERMINAL COMPETITION As being the Team Captain at this project, we led the integration of control and communication systems, successfully advancing the project to the final stage.	02/2026 – Present
TÜBİTAK 2209-B - Sensor Fusion-Based Modular Early Detection System, Early Identification of Potentially Hazardous Unmanned Surface Vehicle Integration of data obtained from image, motion, LIDAR, and GPS sensors into a single embedded system. The system will operate using a weighted fusion algorithm. The project has been actively submitted to TÜBİTAK and is awaiting the final evaluation.	12/2025 – Present
TÜBİTAK 2209-A - University Students Research Projects Support Program, Smart and Sustainable Hospital Water Tank Design Our project has been awarded support by TÜBİTAK.	03/2024 – 05/2025

LANGUAGE SKILLS

TÜRKÇE – Mother tongue

ENGLISH – C2 Proficiency level

VOLUNTEERING

MCBÜKAF, Student Member

Worked voluntarily as a student staff member at the career fair organized within the university.

05/2026 – 05/2026

Manisa, Turkey

General Field Coordination, TÜBİTAK 4007 Manisa Science Festival

I served as the General Field Coordination at the Manisa Science Festival event organized within the scope of the TÜBİTAK 4007 program.

10/2023 – 10/2023

Manisa, Turkey

SKILLS

Artificial Intelligence Enriched Project Management

MATLAB/SIMULINK

I conducted studies using MATLAB/Simulink for simulations and analytical modeling.

PVsyst

I worked with PVsyst in solar energy project design processes.

Microsoft Office

Word, Excel, Project

International Social Experience

I enhanced my international communication skills through professional work experience in the United States.

AutoCAD

I gained experience in creating AutoCAD drawings for solar energy system design projects.

Solid Works

I used SolidWorks for prototype design in various projects.

Project Design

I had parts in various technological projects and have big interest in power system project designing.

Python

I worked with Python to perform image processing and various simulation studies.

EDUCATION AND TRAINING

POLAT ENERJİ- Capacity Building Program for the Energy Sector,

European Bank for Reconstruction and Development (EBRD) & Polat Enerji

Selected as one of 125 engineering candidates through a competitive evaluation process for a prestigious program organized by **European Bank for Reconstruction and Development (EBRD) and Polat Enerji**, continuing until January 2027. Received specialized training in renewable energy systems, green and digital transformation, and low-carbon engineering while gaining insights into global energy markets and sustainability-focused engineering practices.

10/2025 – Present

Manisa, Turkey
