

Oğuzhan ÖNDER

Artificial Intelligence and Machine Learning / Undergraduate

✉ oguzhanonder53@gmail.com ☎ +90 544 410 36 91 📍 Manisa/Türkiye 🌐 LinkedIn

PROFILE

Oğuzhan ÖNDER is a second-year undergraduate student in the Artificial Intelligence and Machine Learning program at Manisa Celal Bayar University. He has been working for four months at the Project Coordination Application and Research Center under İŞKUR, where he actively contributes to project support processes and has gained experience in team coordination, task tracking, and responsibility management within a structured working environment. He uses Python at an intermediate level and conducts data analysis and basic machine learning applications using **NumPy**, **Pandas**, **Scikit-learn**, and **LangChain**. He has supported his theoretical background in machine learning with practical implementations and continues to develop his skills in computer vision and object detection using **OpenCV** and **YOLO**. Additionally, he is proficient in using **Canva** to prepare academic and technical presentations and posters, is well-adapted to teamwork, fulfills assigned tasks with a strong sense of responsibility, and approaches the internship process as a learning-oriented opportunity for professional development.

EDUCATION

Artificial Intelligence and Machine Learning
Manisa Celal Bayar University

08/2024 – Present
Türkiye

PROFESSIONAL EXPERIENCE

Project Officer

Manisa Celal Bayar University Project Coordination Application and Research Center

10/2025 – Present
Manisa, Türkiye

PROJECTS

STREAM Yaklaşımı ve Yapay Zekâ: Özel Eğitim Öğretmenlerine Özel Eğitim Programı (ÖZDEĞER)

TÜBİTAK 4008 - Project Support Officer

– Accepted – Pre-Implementation Phase

The project proposal was successfully accepted by TÜBİTAK. Currently in the preparation and planning phase; contributed to the project writing process, and organizational groundwork is being established.

Teknofest 2026 – Mobile Satellite Technologies Competition

Team Member

– In Progress – KTR Phase (ÖTR Phase Passed)

The team successfully passed the ÖTR phase and is currently in the KTR phase, actively contributing to the ongoing work packages of the project.

Teknofest 2026

Financial Technologies competition- Team captain

– In Progress, Results Pending

In the event that the application is accepted, an active role will be undertaken in the work packages related to dataset creation, model development, and model training.

Teknofest 2026

Artificial Intelligence in Aviation Competition- Team Member

-In Progress, Results Pending

In the event that the application is accepted, active roles will be undertaken within the project work packages related to dataset creation, image preprocessing, model development, and model training.

LANGUAGES

Türkçe - Native

English - B1

SKILLS

Python (NumPy, Pandas, Scikit-learn, LangChain), OpenCV, YOLO, Image Processing, Object Detection, Data Analysis, Data Preprocessing, Machine Learning Basics, Model Evaluation, Data Labeling & Annotation, LLM, Computer Vision Fundamentals, Tokenization & Text Preprocessing, Transformer Fundamentals (Theoretical), Kaggle, Jupyter Notebook, Google Colab, Canva, Project Writing (TÜBİTAK & TEKNOFEST), Technical Documentation, Teamwork

CERTIFICATES

- KOSGEB Certificate [↗](#)
- Project Management Enriched with STREAM and Artificial Intelligence Certificate [↗](#)
- LLM Course Certificate [↗](#)
